Synopsis

The Path to Cosmic Consciousness is about self-development. It is also about spiritual development. The Sacred Andean tradition shows how the two entwine.

The ethos of the Andean Tradition is equilibrium and harmony, where all the different structures are connected and permanently interact. Humanity is the caretaker of this natural equilibrium. Humans and the Earth have the same natural structure, except that humans have emotions...

In a time when life and the Earth are changing, this understanding is paramount to our personal happiness, as well as to continued balanced life on our planet.
